WHETHER YOU THINK YOU CAN OR YOU THINK YOU CAN'T— YOU ARE RIGHT!

Figure it out yourself, my lad,
You've all that the greatest
of men have had,
And a brain to use
if you would be wise.
With this equipment they all began,
So start at the top and say, "I can."

Look them over, the wise and great
They take their food
from a common plate,
And similar knives & forks they use,
The world considers them
brave and smart,
But you've all they had
when they made their start.

You can triumph and come to skill,
You can be great if you only will.
You're well equipped
for what fight you choose,
You have legs and arms
and a brain to use,
And the man who has risen
great deeds to do
Began his life with no more than you.

*Just hang in there
and keep on trying.*

*"I can do all things through Christ
because He gives me strength." Philippians 4:13*

You are the handicap you must face,
You are the one
who must choose your place,
You must say where you want to go,
How much you will study
the truth to know.
God has equipped you for life, but He
Lets you decide what you want to be.

Courage must come
from the soul within,
The man must furnish the will to win.
So figure it out for yourself, my lad.
You were born with all
that the great have had,
With your equipment they all began
Get hold of yourself and say: "I can."

... "Equipment" by Edgar A. Guest
This was the favorite poem of
George Washington Carver.

Step 5 of the Scientific Method

should be continuing. You should be **DONE** with your experiment. Now is the time to take your daily recorded observations and draw **CONCLUSIONS**.

Analyze the data Draw Conclusions What did you learn?

Does it confirm or refute your hypothesis?

Was your hypothesis correct? If not, that is OK.

**Compare the hypothesis
with results of experiment.**

State your conclusion.

Hypothesis correct?

Yes! That's great!

No, but that's okay.

Organize your data.

Use charts, graphs, line plots, etc.
